

## Air Purification Technology

*Removing odor, corrosion, airborne dust and VOCs  
at wastewater treatment and industrial facilities*

[Website](#) | [Wastewater/Industrial](#) | [Commercial](#) | [Ionization Science](#) | [Library](#) | [About Aerisa](#)

Greetings!

### Visit Our Newly Designed Website- [Aerisa.com](http://Aerisa.com)

We at Aerisa are excited to announce the launch of our newly designed website at the same address: [www.aerisa.com](http://www.aerisa.com)

Our site home page welcomes visitors with a fresh, uncluttered design using animated images and improved content focused on our technology, products and systems.

We've drawn a clear distinction between our two main client types, [Wastewater/Industrial](#) and [Commercial](#), so that respective applicable information may be more easily accessed.

A new [Rep Finder](#) feature provides quick access to contact information for your local Aerisa representative. **Of course, you may also use the website to contact Aerisa directly.**

Our primary goal in developing this new site is to provide easier navigation to Aerisa-related information, but also to serve as an ever-growing technology resource for ionization-based air purification.

Our website will be updated regularly, with new events, product information and library content. Keep an eye on [Aerisa.com](http://Aerisa.com)!

If you experience any problems using the new website or have any suggestions, please contact me.

Sincerely,

*Stuart Humphries*
