

## Air Purification Technology

Removing odor, corrosion, airborne dust and VOCs at wastewater treatment and industrial facilities

[Website](#) | [Wastewater/Industrial](#) | [Commercial](#) | [Ionization Science](#) | [Library](#) | [About Aerisa](#)

Greetings!

### Aerisa Eliminates Wastewater Odors from Tofu Processor

An Aerisa air ionization system is at it again, this time helping Vitasoy USA, Inc., the soyfoods pioneer based in Ayer, Massachusetts. A 4,000 CFM AerSupply makeup air unit with natural gas furnace supplies highly-ionized air into a two-story wastewater sludge dewatering room with vacuum filter and truck bay. Process personnel now enjoy the odor treatment and comfortable temperatures inside this working area.

*"The filter press operator isn't immediately noticed anymore when he walks into production meetings,"* said Stuart Humphries, Director of Sales and Marketing for Aerisa. *"Vitasoy cares about health, safety, and the environment -- the Aerisa air purification system addresses all of these concerns."*

Vacuum Filter

Unlike masking agents or legacy odor control systems that utilize chemicals, carbon or biological media, Aerisa systems supply highly-ionized air with  $O_2^+$  and  $O_2^-$  ions to proactively attack odorous compounds while vastly improving in-area working conditions. *"Wastewater odors from food production is yet another perfect application for our air ionization technology,"* said Humphries. *"Air ionization economically treats a broad range of odorous compounds at many industrial, wastewater treatment and commercial facilities."*

Vitasoy USA was founded in San Francisco's Chinatown in 1979 by Yvonne Lo, marketing soy milks produced by Vitasoy of Hong Kong. Vitasoy USA quickly became the market leader in Chinese groceries, acquiring Nasoya Foods (noodles, wraps, and soy spreads) and Azumaya, Inc. (premium tofu and noodles), while also adding the San Sui tofu brand. Vitasoy USA is an industry environmental leader, each year recycling 80 tons of corrugated cardboard, repurposing 3.4 million pounds of unused soy as animal feed, and pretreating 34.6 million gallons of wastewater.

## QUESTION:

Did you know that Aerisa ionizers have **both [UL](#) and [cUL](#)** (Canada) certification?  
***Click the hyperlinks to see for yourself!***

***AERISA TAKES SAFETY SERIOUSLY***

**CALL TODAY TO SCHEDULE YOUR COMPLIMENTARY  
ODOR-ELIMINATING DEMONSTRATION!**

[AerBreeze](#) is our portable two tube air purification unit with three speed (100 cfm max) fan. We offer a complimentary demo unit trial so you can experience first-hand its effectiveness against your own malodorous "cocktail." **Please contact us at 1-877-4-AERISA (237472) to schedule today.**

## ABOUT AERISA

Aerisa manufactures bipolar ionization technology that results in **dramatic air quality improvements** in a wide array of markets including industrial, institutional, commercial and residential. Aerisa successes are found in the most demanding applications, such as wastewater treatment, food processing, casino, athletic, and transportation. Contact Aerisa at 1-877-4-AERISA (237472) or visit [www.aerisa.com](http://www.aerisa.com).

Sincerely,

***Stuart Humphries***
