

Indoor Air Quality Technology

*Remove Dust and Pollen
Neutralize Odors and Gases
Reduce Energy*

[Website](#) | [Wastewater](#) | [Industrial](#) | [Commercial](#) | [Ionization Science](#) | [About Aerisa](#)

Greetings!

How's the air quality in your dispensary?

Today's cannabis store is not like the old "head shops" where marijuana paraphernalia could be purchased. Today's stores are designed more like an Apple Store. Patrons browse, sample, get an education and are often counseled on the ways of weed.

Aerisa helps present your store in this same light by cleaning the air of the sweet and musty odors associated with cannabis. By installing an ionization system within the ductwork, you will be able to distribute [+/- oxygen ions](#) throughout your store. These ions will [remove the odors](#) and airborne particles creating a healthy and odor free breathing space. These systems will even kill virus, mold, and bacteria!

[These units](#) are simple to install, use very little energy and require no ongoing maintenance. Just plug it in and clean the air...simple as that!

Please email info@aerisa.com for more information or to place your order.

ABOUT AERISA

Aerisa manufactures bipolar ionization technology that results in **dramatic air quality improvements** in a wide array of markets including industrial, institutional, commercial and residential. Aerisa successes are found in the most demanding applications, such as wastewater treatment, food processing, casino, athletic, and transportation.
