

## Indoor Air Quality Technology

*Remove Dust and Pollen  
Neutralize Odors and Gases  
Reduce Energy*

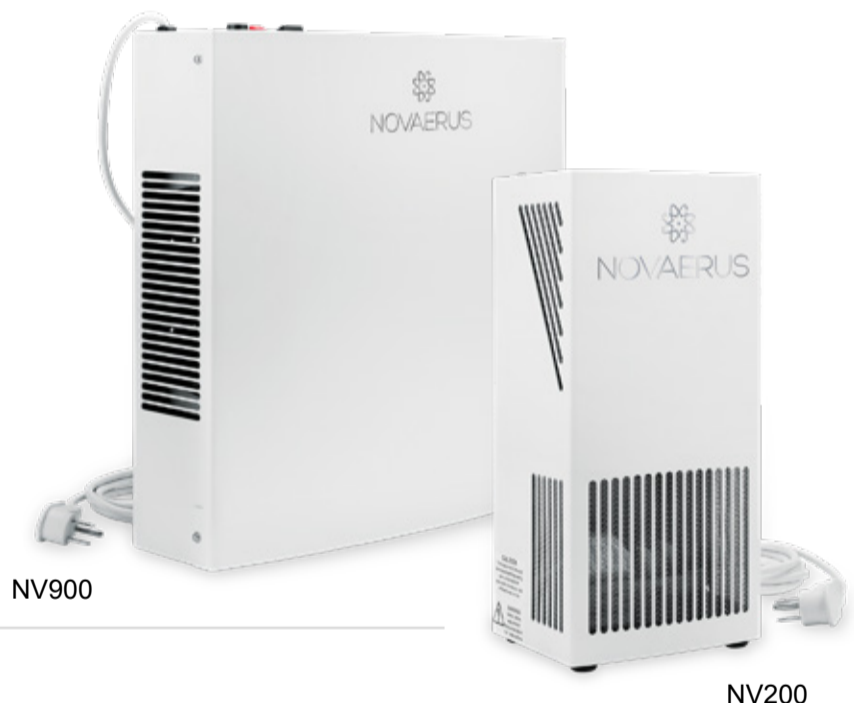

### The Power of a Parent

Aerisa's parent company, **Novaerus**, is also in the business of cleaning the air. Novaerus portable air cleaners are medical-grade units, designed to be used in hospitals, senior living facilities, clinics, nurseries, daycare centers, schools, and even in homes. While the plasma technology is slightly different than ionization used by Aerisa products, the results are the same — safe removal of airborne pathogens, bacteria, VOCs and odor.

Novaerus portables utilize ultra-low energy Plasma Coils in a Dielectric Barrier Discharge (DBD) manner. The technology is similar (i.e. cold plasma). However, the application of the technology is slightly different. With DBD plasma, the microorganisms and air contaminants are exposed directly to the plasma discharge as opposed to by-products of the discharge and are killed or de-activated within the device itself.

We are currently offering two Novaerus portable air cleaners. The **NV200** (50 CFM) is typically used in smaller spaces with a single occupant (such as a bedroom or office). The **NV900** (180 CFM) is for larger areas and multiple occupants (such as a classroom, waiting room or lab). Both are immediately available.

Please [contact your local representative](#) or **Aerisa** directly for further information. Click [here](#) for a brochure of all of Aerisa's products.

Sincerely,

Andy Weiller

### ABOUT AERISA

Aerisa manufactures bipolar ionization technology that results in **dramatic air quality improvements** in a wide array of markets including industrial, institutional, commercial and residential. Aerisa successes are found in the most demanding applications, such as wastewater treatment, food processing, casino, athletic, and transportation.

To put Aerisa's **revolutionary Indoor Air Quality technology** to work for you and your company, please visit [Aerisa.com](#) or call (404) 990-1011.
