Applications for Aerisa Ionization

Aerisa’s ionization products are designed for a variety of applications – small spaces, large spaces, odor sources, trace odors, health issues, safety, or just general indoor air quality.

Airborne contaminants can range from small particulates to living organisms. So, whether the application is for schools, airports or industrial facilities, Aerisa’s ionization solution will attack them all.

Here is an example of different applications and the type of airborne contaminants we focus on.
